BATSAM

WHO WE ARE

“BATSAM FZCO” is a Global Distributor of a unique range of Food & Non Food products, especially our signature “INSTANT BEVERAGE” range which is packed in CUPS under the brand name “BATSAM”.

BATSAM FZCO is the result of an extensive and carefully researched venture strategically located in the most thriving Free zones in Dubai, the Jabel Ali Free Zone, in view of serving the region with its wide & unique product range covering the entire UAE along with the other GCC Nations, Middle East & other parts of the world..

WHAT WE DO

Our product motto is “ANYTIME ANYWHERE...” the main reason being the nature of our products, where we distribute some of the most relished beverages in the powder form (Instant form) in an extremely innovative food grade Polypropylene cup which is sealed with Aluminum foil in the most sophisticated equipment in the packaging industry.

INNOVATION - CUP DESIGN

BATSAM FZCO, brings to you all the comfort in sipping your favorite beverage, ANTIME, ANYWHERE... which literally translates to the fact that our products provide you with an almost ready to drink comfort with the provision of a specially designed CUP, instant beverage powder sealed in an airtight format to retain its freshness and life. All you need is some hot water to enjoy this great concept wherever you are and anytime you wish.

The uniqueness of our product range is the “CUP” in which the products are packed with utmost sophistication and automation. The Cups used for packaging are being made in UAE which are specially designed and engineered for the purpose.

The main features of the CUP can be elaborated as:

- Locally manufactured in UAE in a state of the art, completely automated manufacturing facility
- Use “In Mold Label Technology” for labelling
- Specially crafted “Heat Sinks” to reduce heat for hot beverages
- Tested and approved for “Food Contact Suitability”
- Manufactured using original “Food Grade” materials
- The special sealing and packaging ensures retention of taste, aroma, freshness and life of the products.
